

**Product Datasheet**

**WATERLESS WASH & WAX**  
**Enhance Gloss and water repellency**

**“Hydrophobic Technology”**

**Features and Benefits**

- Enhance gloss of the painted surfaces with built in hydrophobic properties
- Safely lifts away dirt and grime while leaving behind a protective layer of hydrophobic wax
- Unique chemistry insures a scratch-free finish
- Vehicle can be cleaned and polished without a single drop of water
- Dust resistance property with antistatic nature
- As special lubricants and cleaning agents safely loosen and then gently remove the dirt
- In less than 15 minutes, this new formula can morph a drab and dirty appearance into a stunning, clean and shiny car, without a drop of water.
- Ready to use spray that does contain a hydrophobic polymer for added protection
- Perfect for consumers who do not have access to a hose, live in a city or an apartment under water restrictions
- A single bottle, along with the help of a few microfiber towels can wash and wax up to four average-sized cars
- Can be used on exterior car surfaces, painted panels, glass, plastic/rubber
- Easy to be applied in trigger sprayer format with good spread ability

**Technical Properties**

Performance Parameters	Test Method	Specification
Water contact angle	ASTM D7334	95 - 100°
Water sliding angle	--	30 - 35°
Gloss enhancement @ 20°	--	5 to 20 %

Cleaning car with water

Cleaning car without water

## Area of Application

- Automotive car body
- Recreational vehicles
- motorcycles, bikes,
- ATV's, boats, and other painted surfaces.

## Application Procedure

1. Remove the hard mud over the automotive body surface using duster
2. Shake the sample well before use
3. Gently spray the waterless wash and wax product over the surface of the car (Apply to a small section at a time)
4. Rub in and wipe off the dirt immediately using a clean microfiber cloth
5. Do not allow to dry. If dried, spray the product once again and wipe
6. Wipe the solution along with dust in one direction to avoid scratches caused due to dust/mud
7. Spray the product once again over the surface to ensure complete cleaning
8. Wipe with microfiber cloth gently
9. Take a fresh microfiber cloth and buff the surface in circular motion to enhance the gloss
10. Repeat steps 3 to 8 in remaining section of the car

### Instruction

- Apply the product in shaded area only
- As the microfiber cloth is soiled, replace with fresh cloth
